

I pay for XM Satellite Radio. The NAB stations are paid by advertising revenue (commercials). NOAA Broadcasts weather information 24-7 all over the country, FREE. I see no reason why XM should be prevented from offering their WX Service. I believe America is STILL free. Surely the constution allows XM to SELL their service.

I URGE that you, THE FCC, deny the NAB's petition 04-160. I believe in the first amendment rights of all. I see great fall out from this approved petition. Rather that pick on XM, the NAB might consider cleaning up the satellite broadcast of porno which is, as you well know, all over the broadcast spectrum.

I beg you to deny NAB's Petition 04-160.
